

Conclusions

This analysis highlights the provision of accessible natural greenspace within Cambridgeshire, according to the Accessible Natural Greenspace Standard. The key findings of the Cambridgeshire ANGSt analysis are summarised as follows:

The report shows that:

% of households have access to an accessible natural greenspace of at least 2 hectares within 300 metres.

% of households have access to an accessible natural greenspace of at least 20 hectares within 2 kilometres.

% of households have access to an accessible natural greenspace of at least 100 hectares within 5 kilometres

% of households have access to an accessible natural greenspace of at least 500 hectares within 10 kilometres.

% of households have access to all the areas of accessible natural greenspace within the standard.

% of households do not have access to any of the accessible natural greenspace within the standard.
